EXPERIENCE

Full Stack Developer

Faraday Future, Gardena CA

Jun 2018 - Present

- Spearheaded the creation of a reusable React UI library, ensuring consistent design and branding standards across projects
- Directed the development of a robust backend microservice architecture using RESTful APIs and GraphQL, streamlining order intake and user authentication processes
- Collaborated on the development of iOS and Android apps, integrating online services such as user authentication, product pages, and order intake for a seamless user experience on both website and mobile platforms
- Developed and maintained high-impact event and livestream pages for crucial company milestones, including the IPO and EV production launch, ensuring a seamless streaming experience that effectively showcased the organization's accomplishments.

Software Developer

Unis Transportation, Walnut CA

Oct 2017 - Jun 2018

- Revitalized in-house software for employee clock-in, warehouse management, and truck management systems, boosting efficiency and delivering a more user-friendly interface
- Implemented EDI capabilities, allowing clients to electronically place orders and enhancing order processing speed and accuracy

Full Stack Developer

Lash Girl Club, Santa Monica CA

Jan 2017 - Oct 2017

- Contributed to the development of the Lash Girl Club website

EDUCATION

Certification - Machine Learning

Caltech CTME

Oct 2022 - Jun 2023

Bachelor of Science (B.S.) - Applied Mathematics

University of California, Los Angeles

2016
